

SHRINK WRAPPER MACHINE WITH OVEN FOR MEDIUM TO LARGE PRODUCTS DIMENSIONS.

MODEL : EMB-TR

WORKING

Products to be packaged enter from the input conveyor. The machine unfolds the plastic film as the same speed of products. The solder system goes down to weld and cut the film. Thereafter, the packed product enter in the shrinking oven. The entire process is fully automated and requires no operator.

TECHNICAL SPECIFICATIONS

Very robust design. All mechanical, pneumatic and electronic elements are high quality, standards and available on the market.

OPTIONS AVAILABLE

System lateral welds with automatic or manual regulation, Package centering system, coil holder at 90 degrees, calendering system for light or non-rectangular products, motorized belt conveyors, motorized roller conveyors, gravity conveyor rolls filmed products accumulation.

OPTIONS :

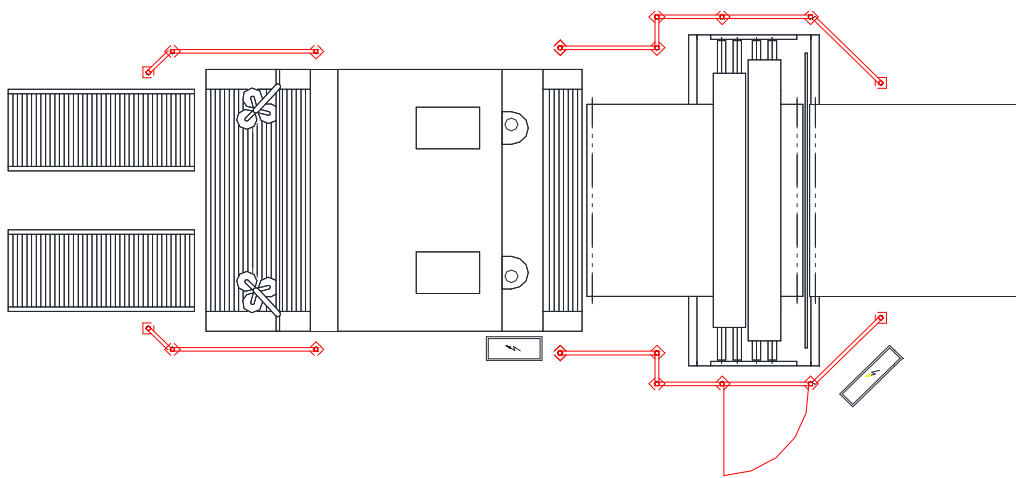

LATERAL WELDING

CALENDERING FILM

Example of lay out for shrink wrapper machine for large products with shrinking oven:

Voltage	220 V ou 380 V
Installed shrink wrapper machine electric power	4 kW
Installed shrinking oven electric power	depending on oven dimensions
Product width minimum passage	200 mm.
Product width maximum passage	3000 mm.
